Vertical Jigging Blanks

The most exciting new way to catch fish virtually anywhere in the world. These American Tackle Vertical Jigging rod blanks have been developed to withstand the stresses put on this new fishing application and handle anything you put on the end of it. Experience this amazing new Jigging system with extremely light weight and powerful Vertical Jigging Blanks. Prototyped and developed in the United States, these rod blanks are constructed from a carbon tape and multi modulus weave mixture along with a single ply of glass fabric. Finish: Gloss Black.

ATX Series – Featuring durable E-glass, graphite, and graphite composite blanks were designed for durability and uncompromised performance. E-glass models in traditional actions provide proven success offshore, while the graphite casting rounds out the inshore arsenal. The graphite composites blend the heavy lifting power of graphite with the durability of fiberglass to win battles everywhere. Offered in a gloss black for E-glass and gloss clear for graphite models.

American Matrix Series – Fuses the beauty of a woven twill graphite material with a traditional intermediate modulus blank design. The result is a cutting edge blank and the first of its kind to be offered to rod builders. The "Matrix" material adds power and sensitivity to the butt section without inhibiting the performance of the unidirectional tip section. Presented in an Emerald Green or Charcoal Grey with matching handles and reel seat inserts. This series brings trend setting to a whole new level.
