What Makes Nano-X Superior

Our specially formulated braiding gives you a round, compact, slightly stiff line that is a dream to cast—especially in windy conditions. Our exclusive post-braiding process gives you a smaller diameter that makes the line stronger, slicker and smoother. For all styles of fishing.

Nano-X Improves Performance

Nano coating helps repel water, salt, dirt and grime – keeping your line clean. It also creates a slick line which reduces friction—allowing for smoother, longer and quieter casts.

Extended Line Life

Exclusive permanent coating penetrates and bonds with the surface of the braid. This lubricates and protects against UV rays – extending the life of your line.

Color	Part Number	Line Rating	KG	Break Strength	Diameter	MSRP
Blue	NX4-10150BL	10LB	5KG	24LB/11KG	.15MM	\$17.79
Blue	NX4-15150BL	15LB	7KG	29LB/13KG	.20MM	\$17.79
